## TUBULAR GOODS

高原钢管公司拥有雄厚的资金实力、高效的管理模式、专业的人才队伍、先进的加工工艺、一流的生产设备、精良的检测仪器，是一家大型的石油管材生产和销售企业。公司目前拥有一条轧管生产线、一条热处理生产线、五条螺纹加工生产线。轧管机组为Accu Roll轧管机组，产品精度高，性能稳定，已成为中石化集团公司合格供应商；热处理生产线建立于2000年，是国内第二条采用日本工艺的热处理生产线；管加工生产线有两台日本 MORI SEIKI专门用于特殊扣生产的高精度数控机床。公司多条生产线配备有超声波探伤、漏磁探伤、磁粉探伤、静水压试验机等高端的检测设备，可加工多种规格、多种钢级的油套管、接箍、钻杆及射孔枪管。油套管、钻杆年加工能力30万吨，热处理年生产能力15万吨，轧管厂年生产能力15万吨。

Highland Steel Pipe Company is a renowned tubular goods manufacturer and supplier, which owns abundant capital, high efficient management system, professional talent team, advanced processing technology, first-class production equipment and sophisticated testing instruments. We have one pipe rolling production line, one heat-treatment production line and five thread machining lines. Hot rolling production line adopts Accu Roll mill to produce high precision, stable performance products which makes Highland a qualified supplier of SinoPec. Heat-treatment production line was founded in year 2000, the second line in domestic built according to Japanese technique. Two Japanese MORI SEIKI high precision CNCs are adopted for premium thread machining in pipe processing line. Advanced testing equipment are installed on machining lines to perform supersonic flaw detecting, magnetic flux leakage testing, magnetic particle inspection and hydrostatic pressure testing on pipes. Tubing, casing, couplings, drill pipes and barrels of perforating guns can be processed in different grades and sizes, with tubing, casing and drill pipe annual output of 300 thousand tons, heat treatment capacity of 150 thousand tons and pipe rolling capacity of 150 thousand tons.
