

## 压裂设备

## FRACTURING UNITS

公司生产系列成套压裂设备，型式包括车载式、拖挂式和橇装式，主要产品包括压裂泵车、混砂车、仪表车、管汇车和相关辅助设备，适应陆地和海洋油气田开发；压裂泵车单机最大输出水功率：1460~1860kW(2000~2500hp)；工作排量1630~3550L/min；工作压力70~142MPa(10000~20000psi)；混砂车最大输出流量13~20m³/min(80~130BPM)；仪表车可采用环形网络与星形网络两种控制方式。

We provide series of fracturing units which are mainly composed of fracturing truck, sand blender, instrument van, manifold truck and other relevant accessory equipment in truck-mounted, trailer-mounted and skid mounted way for land and offshore gas oil field application, with max discharge (water) of single fracturing truck 2000~2500hp (1460~1860kW), working displacement 1630~3550L/min, working pressure 10000~20000psi (70~142MPa), max discharge of blender 80~130BPM (13~20m³/min). Two controlling modes of series network and satellite network are available for instrument van.
